1000 SERIES FLATBED

DewEze® Reveals 1000 Series Flatbed

The flatbed that revolutionized the agriculture market decades ago, is now being offered exclusively to the NTEA work truck market; providing the same quality and durability as the DewEze Clutch Pump Kits you have relied on for years. DewEze manufactures each flatbed with an innovative design, adding superior strength to weight ratio and engineered to serve various markets.

RECEIVER **HITCH** & ADJUSTABLE **GOOSENECK**

The standard 1000 Series Flatbed is equipped with a 40,000lb recessed gooseneck ball which includes an adjustable hitch placement. A receiver hitch and D-rings complete the package to assist with all hauling needs.

ACROSS-THE-BED & UNDERBELLY TOOLBOX

Across-the-bed and underbelly toolbox options offer additional storage. The underbelly toolbox features a step and rubber mat for easy access to the across-the-bed toolbox. *(Optional)*

SPRAY-ON CORROSION PROTECTIVE COATING

All DewEze Flatbeds are finished by applying *Gatorhyde* lining to the deck surface. This polyurethane coating creates a corrosion resistant surface, designed to withstand treacherous weather and built to last.

SIDE RAILS

To better organize and transport supplies, easy to install steel side rails are available for each 1000 Series Flatbed. The side rails are specifically designed to fit each flatbed model by simply inserting the rails into the stake pockets. *(Optional)*

ILLUMINATED LED LIGHTS

High-quality LED lights are located within the headache rack, side clearance, and tail/brake lights, increasing efficiency and extending the life of the lights.

HEADACHE RACK SWING LIGHT KIT

The DewEze swing light kit leads the way during after-hour tasks. This controlled position light system creates additional lighting for your flatbed, yet folds flush within the headache rack when not in use. *(Optional)*

2 year TWO-YEAR FLATBED WARRANTY

There's a reason why DewEze beds have the best resale value in the industry: durable, strong, and reliable steel construction. A bed built to outlast the truck you put them on, and backed by a two-year warranty.
