THE NEED FOR FEED

Cubes or grain, piles or rows, the BeefCake by DewEze lets you feed your way. Improve feeding efficiency in your operation with the dual auger system designed to reduce waste and prevent build up. Feed safely from the comfort of your cab and lower the flexible rubber chute with the push of a button. Take the guesswork out of feed weights with the scale ready design and digital counter. The weather-resistant lid keeps out dirt and moisture, providing years of trouble-free performance. Strength. Sophistication. Durability. That's the BeefCake by DewEze.

Chain Drive, Twin Augers

Dispense range cubes, DDGS, rolled corn and more. The dual auger system delivers the solutions you need, from eliminating bridging to wasteful feedstuff damage by reducing RPMs.

Power Source

Available in electric or hydraulic models, the BeefCake is easy to install to your feed truck power source.

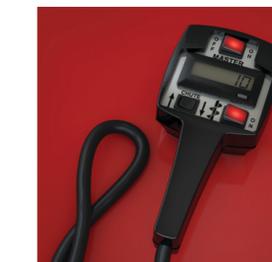

Ground Opening Lid

Open and close the lid with a convenient, ground-accessible handle to cut down on chore time.

Feeding Style

Pairing new technology with traditional practices, the BeefCake is engineered to feed in piles or in a line.

Convenient Hand Control

The integrated, digital counter displays revolutions, offering ration management in the palm of your hand.

Flexible Rubber Chute

Constructed to withstand impact from everyday obstacles, this original rubber chute guarantees long-lasting durability.

Actuator Kit

Complete your feeder with the actuator kit, available for automation of the chute from the corded hand control. *(optional)*

Light Bar

Upgrade your BeefCake with the easy to install LED light bar, featuring clearance, rear and work lights. *(optional)*

Cotton Capacity: 900 lb.

COTTON EDITION

Expanding the heavy-duty construction of the BeefCake, DewEze is now offering a feed box focused on augering cotton seed to your herd. The Cotton Edition model pairs a steel agitator with the standard BeefCake twin augers to reduce congestion and redirect flow. A pin located on the passenger side of the unit allows the operator to quickly engage and disengage the agitator to switch between feed supplements.
