

# REEL TRANSPORT

## HYDRAULIC KITS MANUFACTURED IN-HOUSE

DewEze Hydraulic Clutch Pump Kits run independent of your truck's transmission, giving you instant, mobile hydraulic power with a flip of a switch.

## 3100 LB LIFT CAPACITY

The DewEze Reel Transport bed is equipped with a pair of risers, lift bar and dual lift cylinders, designed for easy loading and unloading up to 3,100 lbs.

## WORRY-FREE WARRANTY

We build DewEze Clutch Pump Kits to go the distance. Should something go wrong, rest easy knowing that your R/T bed is also covered by a one-year warranty on the hydraulics system.

## XM EXTENDABLE ARM BED

For reels that require additional reach, the DewEze R/T is available in an Extendable Arm model, allowing the arms to hydraulically telescope an additional 20 inches. *(Optional)*

## Get Reel with the DewEze® R/T Bed

The DewEze Reel Transport bed combines an integrated reel lift into a durable flatbed, creating a versatile unit for standard loads and fifth wheel towing. This unique design is the heavy lifter for reels and spools making it the most cost-effective bed on the market.

## DUMMY ARMS

To assist with hauling needs, the R/T bed includes dummy arms that are assembled with tie down hooks. While the lift bar is not in use, the dummy arms align with the bed arms to create side rails on the perimeter of the deck.

## WIRELESS REMOTE

Each DewEze Hydraulic Clutch Pump Kit comes standard with a wireless remote. Regardless of the weather, you can complete your work from the comfort of your cab.

## REAR HYDRAULIC COUPLERS

Powered by a DewEze hydraulic system, the R/T bed offers easy access to the rear couplers for moving or operating hydraulic equipment and tool circuits.
